

A choice of business grade Internet connections

Abtec has a range of Internet access options to suit your organisation. From standard ADSL through to dedicated line Internet access, our connections could help you manage your Internet access better and reduce costs.

Access that grows with your organisation

Abtec is a RIPE LIR (Local Internet Registry) and an ISP (Internet Service Provider). We provide great value Internet access in a variety of access methods. Your choice of Internet service will depend on the several factors, including geography and the importance of the internet to your organisation. Our network specialists can help you identify the right connection for your organisation.

Our dedicated Internet access, EFM and GEA Leased Lines are SIP ready. SIP trunks are a low cost alternative to ISDN 30 connections.

Unlike many of our competitors we only supply business grade Internet access. Our service is backed up by UK based engineers that are available 24/7.

Ideal for organisations:

- That want to centrally manage their Internet access
- Who want to reduce IT hardware costs
- With homeworkers

- *Choice of shared or dedicated internet access*
- *Fibre broadband access (FTTC) available*
- *Bandwidths up to 10 Gbps*
- *UK based support and engineering team – get through to the experts on your first call*

Authorised partner of

Business Broadband ADSL <ul style="list-style-type: none"> Up to 17 Mbps download Unlimited usage Includes static IP address 	Fibre to the Cabinet Fast <ul style="list-style-type: none"> Up to 40 Mbps download Up to 10 Mbps upload Unlimited usage Includes static IP address 	Dedicated Leased Line <ul style="list-style-type: none"> Guaranteed speeds From 2 Mbps - 10 Gbps Symmetrical bandwidth Uncontended access Static IP addresses included 100% connection availability target Attractive SLAs Available in 99% of the UK Ideal for organisations who rely on the internet SIP telephony ready 	Dedicated Leased Line - EFM <ul style="list-style-type: none"> Guaranteed speeds 99.95% connection availability target From 2 Mbps - 35 Mbps Symmetrical bandwidth
Bonded Broadband <ul style="list-style-type: none"> Up to 4 ADSL connections connected together Greater resilience Unlimited usage Includes static IP address 	Fibre to the Cabinet Super fast <ul style="list-style-type: none"> Up to 80 Mbps download Up to 20 Mbps upload Unlimited usage Includes static IP address 	Dedicated Leased Line - GEA <ul style="list-style-type: none"> Guaranteed speeds delivered using FTTC From 2 Mbps - 30 Mbps Uncontended access Symmetrical bandwidth 	

Fibre Broadband vs. Leased Line

With fibre broadband availability and speeds increasing some question the need for Leased Lines. This isn't a useful comparison, however, as they are two different services with different aims. If internet access is critical to your business a leased line could be better for you. Abtec can help identify which service would be best for you.

Works well with:

- Abtec's virtualisation services
- Abtec Network Monitor
- SIP telephony
- Veeam data backup
- Abtec's Disaster Recovery Services

Monitoring your SLA

Abtec's Leased Lines have a market leading Service Level Agreement (SLA). Our Leased Line connection target availability is 100% (99.5% for GEA access). If our service levels drop below agreed performance levels we could be paying you. To help you monitor your SLA we provide the Abtec Network Monitor as part of your leased line service. This tool monitors your IT resources including networks, devices, applications, traffic and availability. It can monitor different sites from one central installation.

Why choose Abtec?

Abtec's Internet services offer good value access to the Internet. Our access has resilience built in, backed up by a 24/7 engineering force based in the UK. Your organisation could benefit from business grade internet, managed by Cisco accredited experts.

We can wrap all of your Abtec services into one bill. Our online billing system has a variety of reports built in, putting you in control of your costs and reducing the time required to administer the bills.
