Smart business backup with Abtec and Veeam Cloud Connect

In an ideal world we'd all use the 3-2-1 rule for backups. In the real world limited bandwidth, growing data volumes and management resources prohibits many organisations from achieving that goal.

Not for much longer. You can now strengthen your off-site backup regime with Abtec and Veeam Cloud Connect. We can store your primary or secondary Veeam backups in our secure data centre. Our Veeam optimised network connections can help speed up your backup and recovery process.

Veeam optimised network

We provide network connections that are optimised for Veeam data transit. Using our Veeam optimised network can increase the success rate of incremental backups and reduce data recovery time. The connection perfectly complements Veeam services such as WAN Acceleration; further reducing upload and download times significantly. We recommend bandwidth speeds over 100Mbps for Veeam Cloud Connect to work effectively, preferably using an uncontended network service. Our Veeam optimised network is available in speeds up to 10Gbps. Contact us to find out more about our Veeam Cloud Connect and optimised network bundles.

Veeam Cloud Connect Free Trial

Want to test the service? Not a problem, contact us on 01858 438 500 to set up a free trial, or visit **our website**.
