

Network Engineer

Job Title: Network Engineer
Company: Abtec Network Systems Ltd
Department: Engineering
Location: Market Harborough, Leicestershire
Reports to: Engineering Manager
Salary: £17K-£22K experience dependant, on call bonus and company profit share
Website: www.abtecnet.com

Company Background:

Abtec Network Systems is a leading managed service provider, supplying enterprises across the UK with of IT services and networks. Formed in 1991, Abtec has grown successfully because of its ability to provide sophisticated turnkey solutions to overcome business challenges. At Abtec you'll be contributing to varied and exciting projects; and extending your own professional development. Our previous projects include:

- The design, deployment and management of networks and IT services at the new nuclear power station Hinkley Point C's workers campuses
- Design of Cisco Wi-Fi infrastructure at Manchester Airport's new £1bln terminal
- The design, deployment and management of networks at Imperial College London

Job Summary:

We're looking for an ambitious and motivated candidate to join our experienced engineering team. You'll be providing networking support for our clients and contributing to exciting new projects.

The successful candidate will be a diligent individual whose priority is delivering high quality Cisco engineering. They should hold good time management skills, and have an understanding of how projects are delivered successfully, within budget.

Key Responsibilities:

- Answering clients' IT questions
- Monitor health of clients' network infrastructure
- Provide networking support to clients via telephone and email for the range of Abtec services
- To provide diagnosis and resolution of issues raised by clients
- Report and manage issues through our wholesale suppliers
- Keeping clients up to date at all times
